1. Class/Seminar Teacher Evaluation

This survey requests your feedback on two separate aspects of your learning experience, split into three sections. The first section asks for your views on your teacher's class/seminar teaching. The second section asks for your views on the course as a whole at this point in time. Finally, the third section asks for some information about you, to aid analysis.

We recognise that this term has been particularly challenging for everyone due to the wider public health situation, with disruption experienced by both students and teaching staff. The School is continually striving to deliver the best possible educational experience despite these challenges and your views about your learning experience at LSE are a valuable source of information about this. The results will be used to help improve the teaching and learning experience for you and your peers and to identify good practice.

The School assumes that your response is broadly positive if you 'mostly agree' or 'definitely agree' with a statement.

- The teacher made sure to engage the class as well as ensure that concepts were clarified clearly and no remaining doubts were left.
- Very clear and thorough explanations using mathematical concepts

- He is very patient and the way he explains a question really help me to understand the materials.
- I think require students to open cameras can increase interaction, but sometimes we are waiting bit too long for students response.

3.26) 2.15 Would you recommend this course to other students?

3.27) 2.16 Please comment below on aspects of this course you think were particularly good.

- None
- The course was intellectually stimulating as it forces you to explain the numbers rather than just state values.

3.28) 2.16b Please comment below on aspects of this course you think could be improved.

- It seems that the exam-style questions are far more conceptual than the problem sets questions. So we do not get much practices on the exam-style questions which is not what I and other students expect. Although problem-set questions do give us some insights of the materials covered in lectures, but generally the questions on problem sets didn't really help us to fully understand the lecture materials. The connection between each week's lecture materials and the problem sets is too weak.
- Perhaps the explanation by the lecturers themselves
