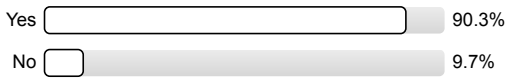
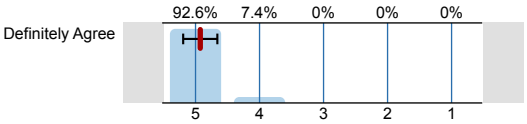
1. was my teacher

1.1)



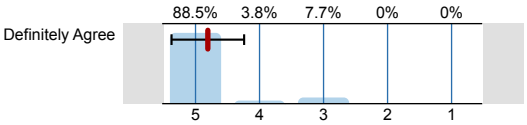
n=31

1.2) The teacher communicated ideas and concepts effectively.



n=27
av.=4.9
dev.=0.3
cf=100.00%

1.3) The feedback I received from this teacher has helped my learning and performance (select N/A if another teacher was responsible for providing you with feedback for this course)



n=26
av.=4.8
dev.=0.6
cf=92.31%

1.4) Please comment on aspects of this teacher's teaching you think were particularly good.

- Everything was perfect.
  He delivered not just a content but the intuition behind it.
  He also listened carefully and encouraged students to engage in the context. This helps students think hard before getting the answers.
  I've never seen this kind of teacher. I strongly recommend him. I can't imagine this course without him.
- He is a really good teacher. Ensures that we are learning the concepts well and takes the time and effort to teach efficiently.
- He is so good at teaching and can explain the content clearly and in detail. His patience and excellent understanding of the course make most students engage in the discussion. He can encourage me to think about how to induce the conclusion rather than just tell me the result.
- He was truly brilliant in teaching. His seminar gave me chance to learn and understand econometrics, and also to feel more attached to the statistics by teaching intuitively, which was very different from the class experience that I had back in my country, korea. It was my first experience understanding mathematical method with intuition. And he was also kind in office hour, always being friendly and kind to students.
- His teaching style and his explanations were good
- I think Tom is a great teacher. He communicates really well, and I've always been able to understand him.
- It would not be an exaggeration to say that I was able to understand this class because of Tom. I loved the clear explanations and clear answers to any questions. The best seminar teacher.
- Monk is the best teacher ever.
- Tom has been a very effective teacher who explained all concepts clearly, and multiple times if necessary. He encouraged everyone to participate and really helped us build our intuition by going through the logic of each question meticulously.
- Tom is a fantastic seminar teacher. Quant is a new topic for me and I was apprehensive that I would be able to grasp all of the technical material. Tom has a natural way of explaining complex technical info in a digestible way and after every seminar I felt more confident in the material. Tom always answered my questions in a thorough manner and clearly cares about the success of his students.
- Tom is a wonderful teacher and puts a lot of effort into developing intuitive understanding of concepts. His teaching method is very effective and has helped greatly with recall. He is one of the best seminar teachers I have learnt from.

- Tom is an excellent teacher. Highly knowledeable, enthusiastic, and invested that his students learn. He is open to any questions and ready to creatively explain concepts until we have fully understood them.
- Tom is very good with delivering key concepts in a comprehensible way - something I think is very difficult to do in a very quantitative subject. One of the best interactions I've had in LSE so far
- Tom was a saving grace for PP455. I started the year very nervous about the course but I always felt far more confident in my understanding of the material after our seminars. It takes a very special skillset to be able to teach such complex materials in an easy to understand way without losing the necessary nuance that comes with trying to estimate causal effects. The SPP is very lucky to have Tom and he makes a huge difference in the success of the students in his seminar groups.
- Very well structured problem set solutions. Definitely helpful for the final exam!

1.5) Please comment on aspects of this teacher's teaching you think could be improved.

- He does not have anything to be improved more
- He is perfect. Maybe more office hours will be better if his time is available.
- Honestly, no idea. Just shorten some of the problem sets so that we can actually finish going through them in the seminars and not in the support classes.
- I don't think Tom is as approachable - mostly because his office hours are booked within minutes, and also questions relating to any summative we have are usually not answered which is understandable but rough because who do we even ask?
- I don’t think so :)
- I wish he could be contacted by email.
- Nothing - Tom is an excellent teacher!!! I think these seminars would benefit from being 1.5 hours as sometimes we weren't able to cover the full problem set.
- Seminar time is too short.
- We all can agree Tom is great however, please try to be as basic as possible. We are new to this course and we cannot match to your standard and thought process.

1.6) Overall, I am satisfied with the teaching by this teacher on the course.
